

Chapter 10 - Key Terms

 Term	 Page	 Description
<u>NetFlow</u>	584	A Cisco technology that provides comprehensive visibility into all network traffic that traverses a Cisco-supported device. NetFlow is used as a network security tool because its reporting capabilities provide nonrepudiation, anomaly detection, and investigative capabilities. As network traffic traverses a NetFlow-enabled device, the device collects traffic flow information and provides a network administrator or security professional with detailed information about such flows.
<u>tcpdump</u>	588	An open-source packet capture utility.
<u>Wireshark</u>	590	An open-source packet capture sniffer.
<u>tshark</u>	589	A command-line tool used to capture and analyze IP packets.
